## Broadband Network Update | April 28, 2020

Matrix and subcontractor crews will restart the street-side construction phase of the town-wide Broadband Project on Tuesday, April 28.

When the home activation phase begins in approximately late May–June, subscribers will be contacted directly by Matrix to arrange the individual interior installation schedule. At all times, Matrix will strive to meet the needs of each homeowner's situation and appreciates the cooperation of subscribers to ensure a safe, efficient, and successful installation for all.

### WORK DURING COVID-19

The Matrix crews will be following a corporate-wide COVID-19 Safety Program at all times; this includes following the recommendations of the U.S. Centers for Disease Control (CDC) and U.S. Occupational Safety & Health Administration (OSHA). While crews are working on Petersham streets, it is important that residents maintain their distance so the contractors can remain focused on their work. At the time of home installation, all crew members will be wearing full personal protection equipment.

### QUESTIONS

As always, any questions about the project may be directed to the town at 978-724-3353. Matrix and the Broadband MLP Board will endeavor to answer all questions. For ongoing project updates, visit [www.connectingpetersham.com](http://www.connectingpetersham.com)

*Construction of Petersham's broadband network continues*
